Teams are made up of three persons. If someone is participating in more teams because another team would not have enough members then in the group results the scoring reached with the full team is the one that what counts, while in single's category the scoring of the best result.

Length of the tract is 300 m, and 5-6 m wide. The fastest speed that can be reached is 40-45 km/h. The course is equipped with computerized stopwatch system.

In individual races, the best time of the rated runs provides the score for the driver, in team competition the sum of all scores from the three members is the team's score.

In case of identical scores, the order will be determined by using the better scores from the worst runs. If these scores are also identical than the better scores in the second are the determinants. The same principle is to be followed in case of further identical results.
